- Performed testing and evaluation of processed cocoa products for research purposes.
- Documented and reported laboratory results to support research and development activities.

EDUCATION

Bachelor of Agricultural Industrial Technology (S.T.P.)

University of Darussalam Gontor | 2021 - 2025

Secondary Education

Boarding School of Darussalam Gontor | 2018 - 2021

CERTIFICATIONS & TRAINING

- Certified Halal Product Process Assistant (P3H)
- Basic Web Development Training (Self-paced Course)
- Basic SQL and Database Management Training (Self-paced Course)

CORE SKILLS

Quality Management

- Quality control of raw materials, production processes, and finished food products
- Implementation and evaluation of Standard Operating Procedures (SOP)
- Production process analysis and operational efficiency improvement
- Quality documentation and inspection reporting
- Root cause analysis and corrective & preventive actions (CAPA)
- Understanding of food safety standards and quality systems (e.g., HACCP, GMP)
- Data recording, monitoring, and quality performance evaluation

Research & Product Development (R&D)

- Development and evaluation of processed food products
- Product testing data analysis and continuous improvement
- Agro-industrial process management
- Product formulation and innovation
- Experimental design and basic research methodology
- Sensory evaluation and product quality assessment
- Documentation of research findings and reporting

Supply Chain & Logistics

- Fundamental knowledge of agricultural supply chain management
- Control and monitoring of material flow from raw materials to distribution
- Operational coordination and production performance monitoring
- Inventory management and demand planning basics
- Process optimization and supply chain efficiency improvement
- Coordination with cross-functional teams to ensure smooth operations

Frontend Development

- Front-end development using HTML, CSS, and JavaScript
- Responsive web design & UI implementation
- DOM manipulation & event handling
- Basic UI/UX principles (user-friendly interface)

Backend Development

- Web-based system development for administrative and monitoring purposes
- Backend development using Node.js
- Database management (PostgreSQL, MySQL, SQLite)
- Basic RESTful API development and integration
- System design & basic application architecture
- Data processing and analysis for web applications
- Debugging, troubleshooting, and system maintenance

TOOLS & TECHNOLOGIES

- Microsoft Office (Word, Excel, PowerPoint)
- Canva
- SketchUp
- SQL (Basic)
- Node.js
- PostgreSQL, MySQL, SQLite
- HTML, CSS, JavaScript
- Visual Studio Code (VS Code)

LANGUAGES

- Indonesian (Native)
- English (Intermediate)
- Arabic (Intermediate)
